The Pactola Reservoir—Rapid Creek subwatershed boundary described within this land description was derived from GIS and used for convenience in computing acreage. This subwatershed is also known as Hydrological Unit Code (HUC) 101201100110. This land description intends to include all public lands administered by the USFS within this subwatershed. The actual boundary is intended to be the location of said subwatershed as it exists on the ground.

The areas described aggregate approximately 20,574 acres.

The purpose for the withdrawal requested by the USFS is to protect the cultural and natural resources of the Pactola Reservoir—Rapid Creek Watershed, including municipal water for Rapid City and Ellsworth Air Force Base, from the adverse impacts of minerals exploration and development.

The use of a right-of-way, interagency agreement, or cooperative agreement would not provide adequate protection of cultural and natural resources.

No additional water rights will be needed to fulfill the purpose of the requested withdrawal.

There are no suitable alternative sites, as the described lands contain the resource values that need protection.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice is hereby given that the USFS and the BLM will hold a joint public meeting in connection with the withdrawal application on Wednesday, April 26, 2023, from 4–8 p.m. MT, at the Best Western Ramkota Hotel, Conference Hall, 2111 N. LaCrosse St., Rapid City, SD 57701. The USFS will publish a notice of the time and place in a local newspaper at least 30 days before the scheduled date of the meeting. During the 90-day comment period, the BLM and USFS will hold additional meetings in other areas of the State, notices of which will be provided

in local newspapers or on agency websites.

For a period until March 21, 2025, the NFS lands described earlier will be segregated from settlement, sale, location, or entry under the public land laws, location and entry under the United States mining laws, and leasing under the mineral and geothermal leasing laws, subject to valid existing rights, unless the application is denied or canceled, or the withdrawal is approved prior to that date.

Licenses, permits, cooperative agreements, or discretionary land use authorizations of a temporary nature may be allowed with the approval of the authorized officer of the USFS during the temporary segregation period if they would comply with applicable USFS land use plans for public lands and NFS lands located within the requested withdrawal boundary.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.
